SUMMARY

Software Engineer with **2.5+ years of experience** specializing in **COBOL, JCL, VSAM, SQL, DB2, and DevOps** within Mainframe environments. Skilled in application development, testing, optimization, and production support, with strong problem-solving abilities and experience delivering reliable, scalable solutions. Exposure to **Mainframe modernization and modern engineering practices** to improve application efficiency and maintainability.

TECHNICAL SKILLS

Mainframe: IBM z/OS, COBOL, JCL, DB2, IMS DB, VSAM, SQL, TSO/ISPF, Easytrieve, SORT, IDCAMS

Tools: Topaz Workbench, Xpedit, File-AID, DevX, TWS Scheduler, ServiceNow, Sonarqube, VS Code

DevOps: CI/CD, Git, Azure Repos, Change Management, Incident Management, Production Support

Programming & AI: Python, GitHub Copilot, Prompt Engineering

Methodologies & Practices: Agile, SDLC, Batch Processing, Testing, Debugging

WORK EXPERIENCE

Tata Consultancy Services (Client: ABN AMRO Bank N.V.)

Jan 2024 – Present

Assistant System Engineer, Mumbai, India

- Developed, enhanced, tested, and maintained mainframe applications using **COBOL, JCL, DB2, VSAM, and IBM z/OS**, supporting backend interest calculation processes for a global banking client.
- Designed and executed **Unit, System, and Integration testing** for application changes, validating functional requirements, and ensuring reliable implementation across development, testing, and production environments.
- Conducted code reviews and identified **potential defects and optimization** opportunities, contributing to a **30% reduction** in code-related defects during testing.
- Resolved critical production issues through **root-cause analysis** and timely fixes, contributing to a **20% reduction in system downtime** and improved reliability of critical batch processing.
- Collaborated with **cross-functional teams, business stakeholders, and development teams** to gather, analyze, and implement requirements, ensuring timely and successful delivery of application enhancements.
- Implemented and supported **CI/CD pipelines for deployment automation**, streamlining the release process, and improving deployment efficiency across environments.
- Participated in **Agile development practices**, including sprint planning, daily stand-ups, backlog discussions, and retrospectives to support iterative delivery.
- Conducted **AI knowledge-sharing sessions** and promoted AI best practices within the Mainframe teams, encouraging adoption of emerging technologies and continuous technical learning.

KEY PROJECTS

NGCP Validation Changes

- Optimized **COBOL batch jobs**, reducing execution time by **30%** and improving processing efficiency.
- Executed system integration testing (SIT) and user acceptance testing (UAT), ensuring defect-free releases in Agile.
- Provided **production support** and resolved critical issues to maintain system stability and business continuity.
- Technologies:** COBOL, JCL, OPC Scheduler, Easytrieve, IBM z/OS

z/OS connect API Enablement

- Developed, tested, and deployed **REST APIs** using IBM z/OS Connect EE.
- Performed API validation and functional testing using **Postman**, ensuring accurate request/response handling and reliable integration with backend mainframe programs.
- Technologies:** z/OS Connect EE, REST APIs, Postman, IMS DB, DB2, IBM z/OS

EDUCATION

Bachelor of Engineering in Information Technology

Aug 2019 – May 2023

Rajiv Gandhi Institute of Technology, Mumbai, India

CGPA: 8.25

AWARDS & ACHIEVEMENTS

- TCS: Best Rookie Award during a client visit to TCS-India 2025
- TCS: Multiple Awards for Excellence, On the Spot (Team) Award
- Won the RIO Skit Competition (2025 & 2026) during RIO, recognized for creativity and team coordination.
- Won the Badminton and Burpees Challenge, TCS Karmayuddh 5.0
